Education

McMaster University (B.Eng.Mgt) Hamilton, ON

Bachelor of Computer Engineering and Management, ***GPA: 3.72/4.00*** *Sep. 2020 – Apr. 2025*

- McMaster Honour Award ($1,000) | Dean's Honour List (Fall 2020 - Winter 2022)

Technical Skills

Languages: Java • Python • C/C++ • YANG • JavaScript • Verilog • MATLAB • R • LaTeX
Web Development: HTML • CSS • React.js • Node.js
Tools: Git/GitHub • Jira • BitBucket • VS Code • Linux • Confluence • Agile • Quartus II • Raspberry Pi • Arduino

Experience

Software Intern May 2023 - Aug. 2023

Ciena *Ottawa, ON*

- Utilized **Python**, **C**, and **YANG** to establish a wacsim to manage test suites and improve client experience.
- Improved memory efficiency of a test suite by **40%** using **Linux shell script** and **Python File I/O**.
- Tested changes in hardware by upgrading from **3+** different states to ensure the behaviour is as expected.
- Applied skills in version control (**Git**, **BitBucket**, and **Jira**) to seamlessly integrate my changes with the team.

Waveserver Software Intern May 2022 - Aug. 2022

Ciena *Ottawa, ON*

- Assisted in the development of test suites to configure a wacsim using **Python** code to solve client issues.
- Utilized **Postman** and **MG-SOFT** to perform Get and Set requests to manage data from a **YANG** tree.
- Appended data to **JSON** and **XML** files to compare data received from Get requests to validate expected results.
- Worked with Python libraries such as **Paramiko** to establish a remote connection to create verification tests.
- Cooperated with a coding team using **Git**, **BitBucket**, **Confluence**, and **Jira**, while practicing **Scrum** methods.

Projects

Heart Pacemaker | *Python Developer* Sep. 2022 - Dec. 2022

- Created a pacemaker which monitors and regulates a patient's heart rate using different configurations in **MATLAB Simulink** and a **GUI** in **Python** to register users as well as adjust parameters.
- Designed an appealing user interface using **Python Tkinter** and used **Pyserial** to interface with the hardware.

Management System | *Java Developer* Apr. 2021 - May 2021

- Designed a management system which tracks the names, IDs, and wages of employees, optimizing the time needed to manage employee data by **70%** using **Java File I/O**.
- Implemented features, allowing for the addition to, removal from, alteration, search, and deletion of employee files.

Extracurricular

Software Sub-Team Member Oct. 2022 – Apr. 2023

Maction | McMaster University *Hamilton, ON*

- Created a medical dispenser which eases drug withdrawals by **50%**, through the controlled release of chemicals.
- Interfaced with **Python** and an **Arduino** to collect sensor data for the controlled release of chemicals.
- Designed a graphical user interface using **React.js** and **Node.js** to improve client satisfaction.

Circuitry Sub-Team Member Sep. 2021 – Apr. 2023

Chem-E Car Team | McMaster University *Hamilton, ON*

- Collaborated with **10+** teammates to design a car that can travel a set distance of 50'-100' carrying a load using sensor data in the **Linux environment**.
- Coded in **C/C++**, soldered circuits, and worked with an **Arduino** and **Raspberry Pi** to create the car's circuitry framework.
- Created and maintained the club's website using **HTML**, **CSS** and **JavaScript** to improve club outreach by **40%**.
